

Talent and growth competitiveness becomes location-ecosystem competition

Structural | Evidence current to 2026-09-02 | Medium-high on the strategic link; medium on persistence of the 2025 mobility decline

1. The CEO Verdict

Talent mobility is becoming a leading indicator of national and corporate technology competitiveness. ^[1]

The strategic unit is the location ecosystem, not the immigration program alone.

2. Why Now

Figure 1. The evidence path to the present inflection
The sequence summarizes the archive and does not imply uniform adoption across markets or companies.

3. Value at Stake

REPORTED ACTUAL 3.7m to 3.3m cross-border moves by highly skilled professionals in 2024 and 2025, a reported 10.8% decline. ^[1]	REPORTED ACTUAL -19% reported decline in cross-border mobility of research talent in 2025. ^[1]
REPORTED ACTUAL 17x reported likelihood that countries leading in talent for a technology also lead in that technology. ^[1]	SURVEY +1 pp annual shareholder-value advantage reported for companies with more global talent in leadership roles. ^[1]

Each anchor was checked against the cited passage; the measurement type is shown above the value.

The value case links talent availability to innovation output, time to hire, location cost, retention and the option value of distributed teams. Incentives that attract people without research infrastructure or career pathways may have low persistence. ^[1]

4. How the Game Changes

01	Talent and technology leadership reinforce Clusters compound through people, capital, institutions and demand. ^[1]
02	Policy affects location with a lag Rhetoric and rules can change future flows before installed capacity moves. ^[1]
03	Retention matters as much as attraction Leadership opportunity, research infrastructure and quality of life determine durable advantage. ^[1]

5. Your Exposure & Strategic Choices

Where exposure concentrates

Countries	Integrate immigration, education, research and cluster policy.
Companies	Design talent and R&D footprints together.
Boards	Monitor mobility as an early strategic signal.

Figure 3. Where the trend enters the enterprise system

Choices that cannot be delegated

CEO CHOICE · ATLAS JUDGMENT Bring talent in or move work out Should scarce talent relocate to the business, or should R&D and decision work move to talent hubs? Trade-off: Relocation supports integration; distributed work widens access but raises coordination and control costs.	CEO CHOICE · ATLAS JUDGMENT Subsidize attraction or build the ecosystem Should resources prioritize immediate recruitment or durable research, education and career infrastructure? Trade-off: Incentives move faster; ecosystem investment compounds but takes longer to prove.

6. CEO Agenda & Signposts

Action sequence

01 NEXT 90 DAYS Map critical talent Identify roles and locations that constrain the strategy.	02 NEXT 90 DAYS Stress-test mobility Model lower movement and higher remote-work dependence.
03 6-12 MONTHS Build ecosystem partnerships Connect hiring, universities and public talent programs.	

Figure 4. The management response in sequence

Leading indicators

01	Net inflow and retention by skill
02	Time to fill critical roles
03	Research-talent location
04	Leadership mobility

What would change our view

- Mobility could rebound after one weak year.
- Remote work may substitute for some physical relocation.
- Talent inflows do not guarantee commercialization.

Evidence boundary

Medium-high on the strategic link; medium on persistence of the 2025 mobility decline
The 2025 mobility change is one observed year and should not be extrapolated mechanically.
